

## REMARKS

Claims 1-69 have been cancelled. Claims 70-135 are pending.

The Examiner has rejected claims 13, 36, and 59 under 35 U.S.C. 103(a) as being unpatentable over Huitema in view of Belzile. The Examiner has rejected claims 1, 24, and 47 under 35 U.S.C. 103(a) as being unpatentable over Frese in view of Boden. Claims 1-69 have been cancelled. Claims 70-135 have been added to clarify the subject matter regarded as the invention. Huitema, Belzile, Frese, or Boden does not describe “a processor configured to run an operating system that is optimized to provide a network name-related functionality, including by omitting from the operating system at least one software component that is not required to provide the network name-related functionality but that would be required to be included in the operating system if the processor were to be configured or configurable to be used to perform a task not required to be performed to provide the network name-related functionality,” as recited in claim 70. As such, claim 70 is believed to be allowable.

Claims 71-91 depend from claim 70 and are believed to be allowable for the same reasons described above.

Claims 92-113 recite methods executed by the systems of claims 70-91, respectively. Therefore, it is believed that claims 92-113 are also allowable.

Claims 114-135 recite program code for carrying out the methods of claims 92-113, respectively. Therefore, it is believed that claims 114-135 are also allowable.

Reconsideration of the application and allowance of all claims are respectfully requested based on the preceding remarks. If at any time the Examiner believes that an interview would be

helpful, please contact the undersigned.

Respectfully submitted,

Dated: 7/22/2005
